capacity of the channels through the city of Jamestown. The city of Jamestown flood operations plan has been activated to assure that internal drainage is pumped back into the channel in that some storm sewers are inoperable.

the existing flows will continue through May 15, 1995. The increase of these releases will impact interests along the James River in LaMoure and Dickey Counties prior to entering the state of South Dakota.

the channel.

The contribution from the Wintering River, in addition to the flow along the Mouse River, has caused overland flooding damages to bridges and roads in Bottineau County. Bottineau County has declared an emergency as of April 4, 1995.

are reported where roads are becoming saturated from the trapped water that is up on the road beds. A major effort is being made to drain trapped water by local interests.

The Pembina River in northeast North Dakota continues above flood stage. The flood stage at Neche is 18 feet and was at 21.33 on the afternoon of April 19. A crest of 22 feet is expected by the 22nd of April. Because of this rise in water, County 12 through Leroy has approximately six inches of water on it. Overland flooding of a large area of agricultural lands is effected. Pembina County declared an emergency on April 20, 1995.
